

***Selectpersons Meeting
November 26, 2012
Besse Building***

Call to order: Mary Lee Rounds called the meeting to order at 6:00 PM

Selectpersons present: Mary Lee Rounds, Beverly Bradstreet, and Mike Getchell

Others attending: Winston Higgins

Minutes from November 12 were accepted pending revisions.

It has been determined that Betty Mason will be the recipient of the Boston Post Cane. A plaque will be presented to her at her home at 4:30, November 12, 2012.

The door closer on the front entrance of the Besse Building fell off election night and came close to hitting a lady in the head. Mike Getchell will purchase a closer and have it installed ASAP.

The well furnishing drinking water to the elementary school will be tested by the State.

Next meeting the select board will schedule a budget meeting for the next fiscal year.

People of Albion have stated the newly installed road signs appear to be backwards. Winston Higgins said the brackets that were with the signs did not allow for proper installation of the signs. In the spring of 2013 Winston will install new post and correct this issue.

The Town of Albion is needs to hire an Animal Control Officer (ACO). A add will be posted around town and in the Town Line. Any one interested in this position should contact one of the Selectpersons, phone numbers and E-Mail addresses are listed on the town's web page.

Mary Lee Rounds received a letter from a resident of School Street requesting their end of the street not be sanded except for severe ice conditions. They stated all the sand causes them [a lot of work in the spring to clean up]. Dialog was held on this request and the Select Board agrees this could be a safety issue with emergency response such as fire and ambulance. Mary Lee Rounds will contact Albion's fire department and NITRAM for their input to the request.

NITRAM is in the process of setting up a liquid calcium storage tank at the sand and salt shed. This will be used to treat the roads before a snow storm. This method is employed by many towns, cities and the State. This will reduce the amount of sand needed. By treating the roads prior, the snow is less likely to stick to the roads making traveling safer.

Meeting is adjourned at 7:40 PM

Respectfully submitted by
Mike Getchell
